Avenue Nurseries

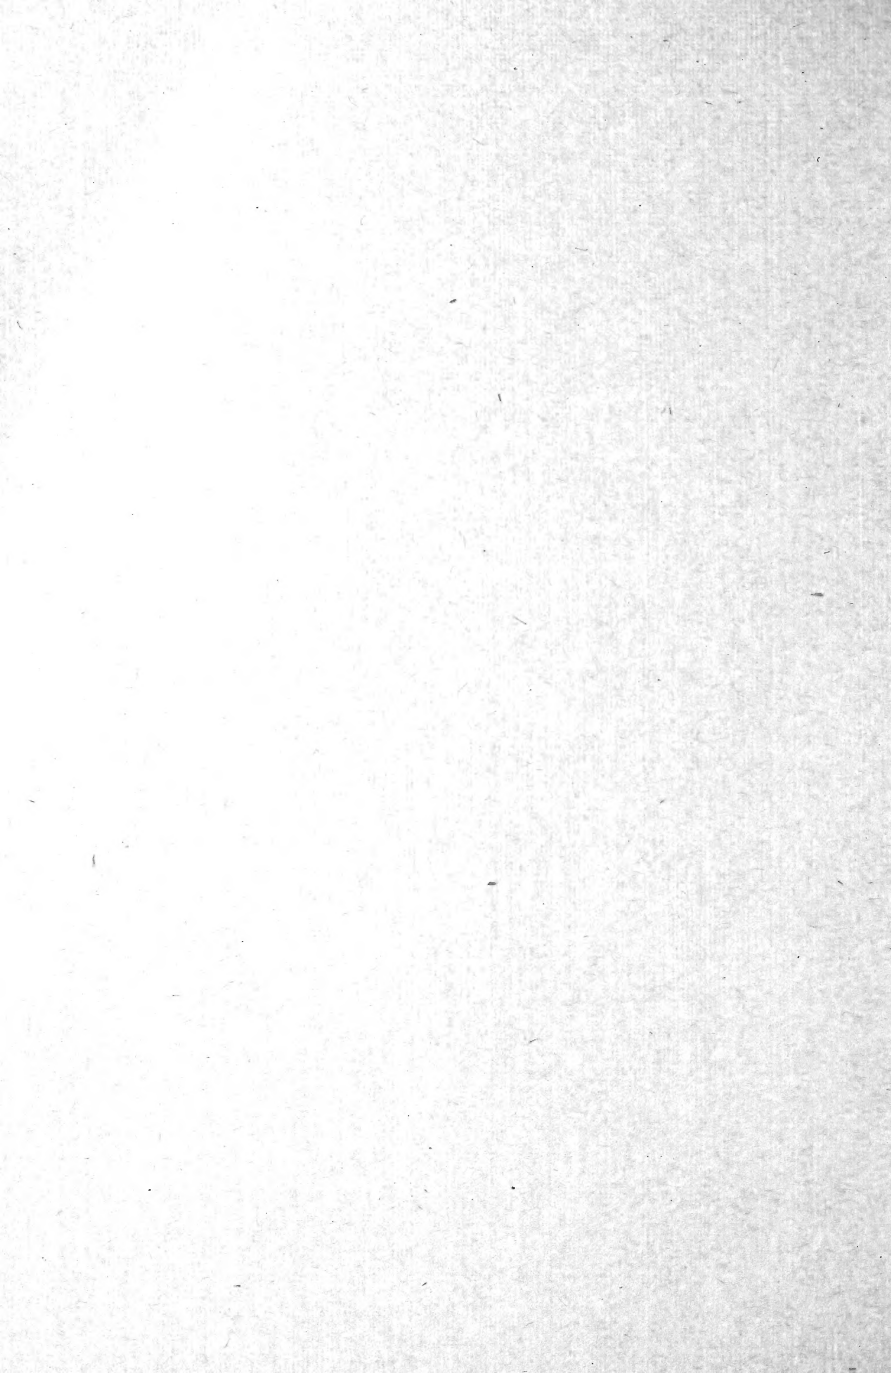

PAINESVILLE, OHIO

W. B. COLE, Proprietor

**Painesville Telephone 97, Connecting with
Long Distance Lines**

PRICE LIST TO PLANTERS

Office and Grounds one and one-half miles west of Painesville, on Mentor Avenue, and 28 miles east of Cleveland. C. P. & E. cars every half hour from Cleveland and Painesville. Stop 79 is in front of our office and grounds.

To Our Patrons

We have carefully arranged prices in this list for each, ten, and one hundred lots, so as to be fair to both the small and large purchaser. The additional charges for small lots are only sufficient to cover extra cost of filling and packing small orders and the prices in quantity will be found reasonable. Anyone wanting one dollar's worth or more of stock will usually find it to their advantage to order direct.

We will furnish one to ten trees or plants at each rates; ten to fifty at prices per ten, and fifty to five hundred at prices per hundred. We request our customers ordering at one-hundred rates to select ten of a sort, or multiples of ten as far as possible. We reserve the privilege of charging extra for a long list of kinds or for scarce sorts, but will notify the purchaser promptly on receipt of order if for any reason we are unable to supply stock at list rates.

Prices are for regular grade of No. 1 stock of size specified. We reserve the privilege of charging extra for stock personally selected by customer, or for trees of extra heavy caliper, but will be reasonable in all our charges.

Stock will be boxed, baled or crated, and delivered at freight or express office at Painesville, Ohio, in good condition without extra charge, purchaser to pay freight and express charges. Probable freight charges within five hundred miles would add twenty-five to seventy-five cents to the cost per hundred of No. 1 fruit trees or one to three dollars if sent by express. The charges for lighter grades of trees, shrubs, and plants would be much less. We will furnish estimates on freight or express charges when requested. Small fruits and other plants can be sent by mail, in which case the postage will be added to bill. Strawberry plants should always be forwarded by express.

Time to Plant.

The weather and soil conditions for shipping and planting nursery stock are best during the months of October, November, March, and April. However, most nursery stock can be shipped and planted any time during the dormant season from October 1st to May 1st, when weather is favorable.

Time to Order.

Order as soon as you can determine your needs. Late in the season often many varieties are sold out and you can avoid being disappointed by ordering early.

Terms.

Our usual terms are one-half cash with order, balance before shipment or C. O. D. To parties known to us to be reliable and of good credit standing, we will book orders and ship for prompt remittance on receipt of order.

Our customers are requested to notify us at once on receipt of goods of any error that may occur in filling order and the same will be promptly corrected. Any delay in transit should be promptly reported.

Prices quoted do not cover risk of transplanting, which loss, if any, of right should be borne by the purchaser, who only can control the conditions after delivery; or any guarantee as to nomenclature. We agree, however, that to the best of our knowledge the varieties shall be true to label, and as evidence of good faith, we will replace, free of charge, any stock that proves untrue to label.

We have aimed to give description of size and grade that will be easily understood. Would be pleased, however, to give any further information wanted by correspondence.

We are growers of nursery stock with twenty-eight years experience and have over two hundred acres of land devoted to the business of growing nursery stock. We have a large modern cellar for storage, equipped with convenience for grading, packing and handling nursery stock with the least possible exposure and greatest dispatch.

Reference—Cleveland Trust Co., Painesville, Ohio.

Each. Per 10.

Note our reduced prices on all kinds of shrubs, roses, etc. The demand for ornamental stock of all kinds has increased to the extent that we are now able to grow and furnish stock in the larger quantity which is wanted, at prices much below that of former years. The stock offered will compare favorably with any.

HEDGE PLANTS
